## **The Use of the Hotel's Foliage and the Green Giveaways**

### **Our Green Meetings Package**

Shangri-La Hotel, Qaryat Al Beri, Abu Dhabi launched the "Green Meetings" – an innovative package that encourages our guests to eat fresh and healthy dishes.

### **Where do we get our produce from?**

Our Engineering team initiated the transformation of our foliage into a functional vegetable garden, from where our chefs get to harvest locally-grown produce, free from artificial fertilisers and toxins, thus reducing the carbon footprint from suppliers to the hotel.

### **How "organic" are our organic produce?**

With synergistic approach, our Food & Beverage and Engineering teams worked together on implementing green technology for our foliage – the use of coffee grounds as natural fertilisers. The procedure includes collection of the used coffee grounds from the hotel's restaurants to a dumping area.

### **The green experience is coupled with a green keepsake...**

It is our delight to give our Green Meetings delegates something unique and special to bring home to their loved ones. Our guests will enjoy a mini pot as a token of remembrance as well as inspiration to grow more greens.
