BIOLOGIQUE RECHERCHE

'Biologique Recherche is above all a unique story of a family's passion and expertise in beauty. Founded over 40 years ago by Yvan and Josette Allouche, a biologist and a physiotherapist, Biologique Recherche is distinguished by this potent combination of disciplines and a visionary approach to cosmetic treatments.

Biologique Recherche has come a long way since those days. We now apply the latest clinical know-how to personalized aesthetic care, employing pure, concentrated – almost raw – ingredients and complex formulas with the rigorous original methodology that has earned Biologique Recherche a reputation for efficacy and long-lasting results.

After Yvan Allouche's demise in 2007, we took the helm of the company and installed the couple's son, Dr. Philippe Allouche, as Creative Director. Biologique Recherche now has a worldwide presence and we continue to invest in Research & Development to uphold our reputation for quality.

Moreover, because we want everyone to enjoy our treatments, Biologique Recherche partnered with the charity Wellness for Cancer to provide personalized treatments for people living with, or recovering from, cancer.

The Biologique Recherche Ambassade is housed in a prestigious building at 30-32 Avenue des Champs Elysées. Opened in 1993, this flagship is both a sanctum of aesthetic skincare expertise and an international training academy for our beauticians. The Ambassade brings together a circle of experts in well-being, beauty, and personalized skincare treatments.'

AN EXCLUSIVE TAILOR-MADE METHODOLOGY

Biologique Recherche's methodology is based on over forty years of experience using innovative products and meticulous protocols to personalise treatments to each Skin Instant®.

Suitable for both men and women, the methodology encompasses three fundamental stages:

Stage 1: Assessment Stage

An expert from Biologique Recherche will start by undertaking a detailed diagnosis of your skin. Using a questionnaire, each individual's Skin Instant® is defined. This assessment then enables the beautician to recommend a personalised beauty treatment.

Stage 2: Initialisation Stage

The treatment protocol begins by preparing your epidermis, which acts as a shield protecting you from external aggressions, in readiness to receive the benefits of your treatment. The rigorous ritual of this stage includes:

- Thorough cleansing of your skin, including a facial massage
- Exfoliation of your skin with our iconic Lotion P50, followed by a face mask

Stage 3: Treatment Stage

Products containing the highest concentrations of active ingredients are applied to "re-condition" the epidermis and help activate both its regenerative properties and stimulate auto-regeneration:

- A tailor-made cocktail of Quintessential Serums is applied by the Biologique Recherche expert.
- The treatment and finishing stage that fixes and optimises the beauty treatment's efficacy through the use of botanical and marine biological active ingredients, creams and finishing serums to suit your skin type and its needs.

These active ingredients work progressively to improve your skin's elasticity, tightening and defining your face's natural contours.

Authentic and harmonious products

The Biologique Recherche products we use in our beauty treatments all fulfil very specific criterias:

- Formulas are high in active ingredients and made with fragrance-free natural or biotechnological ingredients
- To improve the synergistic absorption of active ingredients, the beautician complements manual stimulation with the use of our Remodeling Face® machine to produce exceptional instant results that seem almost magical...

FACE

An in-depth skin diagnosis is a key part of the Biologique Recherche protocol, so we can personalise your beauty treatment according to your Skin Instant® by using a specific physiological, behavioral and tactile approach.

Skin Instant® Lab

The Skin Instant® Lab consists of five sensors (measuring hydration, trans-epidermal water loss, elasticity, pigmentation and sebum levels) linked to a computer with an exclusive diagnostic analysis software program developed by Biologique Recherche. Based on our expert's dermo-cosmetic analysis and objective measurements, the Skin Instant® Lab, retrieves data from our knowledge bank to come up with a selection of products and treatments perfectly matched to your Skin Instant® needs.

Treatments are tailored to the needs of your Skin Instant® by one of our expert beauticians. The longer your beauty treatment is, different specific techniques can be added for better results on your skin.
